

# Africa E-Mobility Week 2026: The Continental Brief

**Stellenbosch, Western Cape, South Africa | 28 to 30 September 2026**

Published 22 September 2026 · Programme as at 16 September 2026

Africa has fourteen months until COP32 in Addis Ababa. The African Group holds the presidency. For the first time, the continent's climate moment and the continent's transport transition sit on the same calendar.

**The African e-mobility sector will arrive in Addis either with a position or as an audience. Africa E-Mobility Week 2026 is where that position starts being formed.**
